

March 2020

A Message from ABC for Health

Amidst the COVID-19 outbreak across Wisconsin, ABC for Health remains open, virtually, and with the help of technology, we maintain our commitment to serving individuals & families--especially children and youth with special healthcare needs.

What is ABC Doing?

Our health benefits advocates, counselors & attorneys continue to serve our clients, partners and their patients via remote assistance. Clients and client referrals can still call our office at (608)261-6939 or [email us](#). Our team will triage the contact and reply as soon as possible.

As the Wisconsin economy falters and people lose existing health coverage due to loss of employment, we expect our call volume to increase. We appreciate your patience and support.

Who Does ABC Serve?

Consider referring individuals & families to ABC for Health if they:

- Are having trouble paying medical bills
- Have lost or will lose health coverage
- Are recently out of work, have reduced hours, or fluctuating income
- Have large medical debt or uncovered medical expenses
- Are Spanish-speaking families
- Have questions about BadgerCare Plus eligibility or rules
- Private insurance denials or out-of-network denials
- Need help determining health coverage options
